DETAILED ACTION

This action is responsive to the amendment filed 04-17-2007, which has been entered.

Claims 1, 3-, 10, 12-21 and 23-32 are currently pending.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the pivot point located with reference to a centerline between the first and second pulley and a theoretical intersection of the belt strand as in claim 1, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-7, 10, 12-16, 21 and 23-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Hutchison (1,615,544). In claims 1, 10 and 21, Hutchison discloses a belt drive system comprising a first and second pulleys (17, 15), a belt (18) reeved over the first and second pulleys; the first pulley (17) is loaded away from the second pulley by a biasing load produce by a first biasing mechanism (19-23) tensioning the first pulley away from the second pulley in a pivoting fashion about a pivot (16). It is apparent that the pivot is located with a reference centerline between the first and second pulleys and it is also apparent that the application of torque or the motive power from the motor of the first pulley in a first direction will elevate belt tension and torque or motive power in the second direction with decrease the belt tension.

In claim 3 and 12, note the pulley is mounted on a drive motor (11) plate is pivotable about a pivot (12), a motor plate (not labeled) on which the motor is mounted and is attached to a frame (10) and a freely pivoting connection (12) between the motor plate and the frame.

In claims 4 and 13, note the second pulley is attached to a wheel drum (14).

In claims 5 and 14, as understood, it is apparent that the motor plate is biased away from the second pulley by the biasing mechanism (19).

In claims 6 and 16, note the biasing mechanism comprises a spring (19) and generates a biasing moment about the pivot (12).

In claims 7 and 16, Hutchison inherently discloses the claimed invention, including the biasing mechanism is a linear force device mounted at a distance (see 24) from the pivot point.

In claim 10, Hutchison clearly discloses the claimed invention above.

In claim 21- and 23-26, Hutchison discloses the claimed invention above.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 3-12, 21 and 22 have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
